Welcome
to the historic city of San Antonio, Texas, and the 73rd annual meeting of the American Society for Reproductive Medicine. This year’s ASRM Scientific Congress & Expo theme is “Advancing Reproductive Medicine to Build Healthy Families.” As the theme implies, this Congress will encompass all aspects of reproductive medicine and technology with a special focus on health. Dr. Anne Steiner, Chair of the Scientific Congress Program Planning Committee, Dr. Karine Chung, Chair of the Pre-Congress Program Committee, and members of their organizing teams have designed a comprehensive, provocative program for Congress attendees. The agenda ranges from the latest molecular and genetic technologies to advocacy for our patients with a focus on access to care. The program is designed to address the educational and intellectual needs of physicians, nurses, andrology and embryology laboratory personnel, genetic counselors, social workers, practice and laboratory managers, as well as practitioners in mental health, law, and ethics.

The Scientific Congress Continuing Medical Education (CME) course offerings will include a stimulating collection of plenary lectures, symposia, and interactive sessions, all supporting the theme of the Congress. Historical perspectives will be presented, as well as cutting-edge lectures on uterine transplantation, novel methods of contraception, menopausal therapy, and the basic science of spermatogenesis and embryo development. Faculty also will address pseudoscientific claims, provide perspectives on the dissemination of scientific information through the media, and contrast in vitro fertilization in humans with other animal species. The interactive sessions are designed to energize and stimulate discussion and interaction among participants, as they focus on a wide range of controversial topics. CME sessions will be complemented by non-CME activities including intimate, in-depth luncheons with recognized experts, and oral and poster-format scientific abstract presentations, representing cutting-edge research in reproductive medicine and biology.

Symposia will include those organized and presented by our international sister societies. Further, Dr. Chung and members of the Pre-Congress Program Committee have collaborated with our affiliated societies and professional and special interest groups to present a wide range of Pre-Congress courses designed to meet the needs of clinicians, scientists, laboratory technologists, nurses, and other health-care and allied professionals.

We welcome our members, trainees, and colleagues from around the world to the ASRM Scientific Congress & Expo! We value your participation and engagement, and hope you will take advantage of the opportunities provided by the meeting to interact and network with colleagues.

I look forward to seeing you in historic San Antonio, where together, we will be “Advancing Reproductive Medicine to Build Healthy Families.”

Sincerely,

Richard J. Paulson, M.D.
ASRM President 2016-2017
San Antonio was named for Saint Anthony of Padua by a Spanish expedition in 1691. In San Antonio’s rich history the city grew to become the largest Spanish settlement in Texas; it was designated as the capital of the Spanish, later Mexican, province of Tejas. The Battle of the Alamo took place in 1836. In 1845, San Antonio along with all of Texas became a state in the Union. San Antonio is currently the 24th largest city in the United States.

San Antonio is home to a rich cultural and arts community, boasts of colleges and universities, attracts Fortune 500 companies, along with sights and flavors for visitors to explore. The city’s most popular attractions are the San Antonio River Walk and the five 18th-century Spanish frontier missions, including The Alamo and San Antonio Missions National Historical Park.

Meandering through downtown San Antonio is The River Walk (also known as Paseo del Río or simply as the River Walk) is a network of walkways along the banks of the San Antonio River, one story beneath the streets of San Antonio, Texas, USA. The River Walk winds and loops under bridges as two parallel sidewalks lined with restaurants and shops, connecting the major tourist draws from the Shops at Rivercenter, to the Arneson River Theatre, to Marriage Island, to La Villita, to HemisFair Park, to the Tower Life Building, to the San Antonio Museum of Art, to the Pearl and the city’s five Spanish colonial missions, including the Alamo.

The Alamo Mission is commonly called The Alamo and was originally known as Misión San Antonio de Valero. It was founded in the 18th century as a Roman Catholic mission and fortress compound, and today is part of the San Antonio Missions World Heritage Site in San Antonio, Texas, United States. It was the site of the Battle of the Alamo in 1836, and is now a museum in the Alamo Plaza Historic District.

Resident Education Program Track

Purpose
ASRM is committed to facilitating and promoting the education of reproductive health professionals at all levels. As part of this mission, the Society develops and coordinates educational activities for resident physicians in training in reproductive medicine. This program also emphasizes understanding of complex topics, interaction with other disciplines, and psychosocial sequelae and ethical concerns in human reproduction. Residents are exposed to a variety of interactive educational methods and have an opportunity to network and interact with faculty experts in the specific topic for the day.

Description
ASRM has organized a series of educational sessions coupled with corresponding scientific symposia. On each day of the Scientific Congress (Monday, Tuesday, Wednesday), there will be an interactive educational presentation that is topically related to a symposium on each of those days. The activities will be evidence-based, free from bias, and independent of commercial influence. The discussions, which will utilize several different learning pedagogies, will require advance independent study of articles, videos, or handouts relevant to the topic of ~20-30 minutes.

Procedure
1. The track is open to residents in obstetrics and gynecology or urology who have preregistered.
2. Registrants will receive an email 2 weeks in advance of the Scientific Congress with a link to the reference reading materials for each daily session (3).
3. On each day of the Scientific Congress, registrants will gather for a luncheon learning session (lunch provided) with a prominent medical educator and a speaker from the day’s corresponding subject symposium. Each day will employ an interactive learning modality that will require a small amount of advance preparation: question-and-answer discussion of clinical cases and team-based learning.
4. Registrants will attend the afternoon symposium corresponding to the day’s learning session.

What are you missing?

Have you looked at ASRM member benefits lately? We are consistently adding value for thousands of physicians and other professionals in the field of reproductive medicine. Boost your career with:

**News and Education**

- Access to cutting-edge research in the Society’s peer-reviewed journals, *Fertility and Sterility* and the *Journal of Assisted Reproduction and Genetics*
- Opportunities for continuing education in person and online through ASRM eLearn® modules, webinars, micro-videos, and certificate courses
- Electronic bulletins from our Washington, D.C. office that help you stay up to date on the latest reproductive health-policy news
- Access to printable Practice and Ethics committee guidelines

**Professional Development and Recognition**

- Networking opportunities, including ASRM Connect, ASRM’s online community platform
- Input into shaping policies and protocols through member groups and ASRM’s access-to-care efforts
- Listing of providers in the new and improved “Find a Health-care Professional” directory on www.ReproductiveFacts.org
- Eligibility to receive ASRM research grants and awards

**Online Resources for Members Only**

- Access to an online member login account, which includes current membership information and member group updates
- Full access to the ASRM Membership Directory
- Access to ASRM’s Career Center to help you find qualified job candidates while enjoying member discounts on job postings—or to help you find that perfect job

Learn more by visiting www.asrm.org and clicking on the Membership tab.

**Joining is easy!**

- Join online at [www.asrm.org](http://www.asrm.org).
- Join by phone at + 1-205-978-5000.
- Or join by visiting us at the ASRM booth during our annual Expo or at other selected meetings throughout the year.

Join Us for

More than A Mother

What are you doing for lunch on Tuesday in San Antonio? The More than a Mother program, hosted by Merck, Germany and the African Fertility Society will open your eyes to some amazing challenges facing infertile women and couples in Africa and other lower income parts of the world. Come hear an infertile Kenyan woman share the isolation and taboo she experienced for not being able to become pregnant. Listen to the Ugandan Minister of Health, a member of the Kenyan parliament, and African and international infertility leaders provide their local solutions. This is a ticketed event with box lunch provided.

Lipiodol HSG and Infertility: Emerging Data

During the ASRM 2017 Scientific Congress & Expo

Do you have plans for lunch on Wednesday in San Antonio?

Join us for a luncheon symposium entitled, Lipiodol HSG and Infertility: Emerging Data. Dr. Benjamin Mol will present Tubal Flushing with Oil- or Water-Soluble Contrast Medium: Results of the H2Oil Trial. Dr. Neil Johnson will present Lipiodol Uterine Bathing or Tubal Flushing - Overview of Evidence up to 2017.

This symposium is a ticketed event with box lunch provided, and is supported by an independent educational grant from Guerbet.

HOW ARE UTERINE FIBROID IMPACTING YOUR PATIENTS?

“I got to work, I sat at my desk and I sneezed, and I just felt it flowing out of me... and I’m like, oh dear... I had to leave, go home and change.”
